## REPORT WRITING

## FINAL PRESENTATION

## SITES VISIT, STAKEHOLDERS MEETING AND DISCUSSION

# Research

## Title:

### **Strengthening Indonesia's Exports of Fish and Processed Fish Products to Canada:**

**How do Canadian food safety standards affect Indonesian fish and processed fish product exports?**

## Result:

1. Canadian Food Safety Standards has influenced private standards
2. Private Standards imposed by Buyer still hinder Indonesian fish export

# Site Visits

**The Canadian Food Inspection Agency (CFIA)**— to receive an overview of the CFIA, its import and export inspection processes, and its laboratory system.

**Ottawa Public Health (OPH)**—to attend OPH’s full-day course on preparing food safely. Topics included food-borne illnesses, bacteria, hygiene and sanitation, and emergency response.

**CanadaGAP**—to understand CanadaGAP’s food safety certification program for fruit and vegetable producers, distributors, and manufacturers, and how the program interacts with Canadian and international regulations on food safety.

**Food Processing Human Resources Council (FPHRC)**—to find out how the FPHRC helps Canadian and international food processors develop and maintain a skilled and stable workforce.

**Farm Boy**—to tour Farm Boy’s flagship location, and to learn about the company’s philosophy, sourcing practices, and responses to public and private regulations and standards.

# Site Visits

**Intertek Testing Services**—to learn about Intertek’s testing and consulting services; attend a guest presentation and overview on Loblaws; and receive a tour of Intertek’s testing facility.

**Canada Halal Examination and Certification (CHEC)**—to learn about CHEC’s halal certification system and practices, and to observe an inspection of Paramount Fine Foods in North York.

**Food Starter**—to tour Food Starter’s food preparation and packaging facilities, which are designed to help food sector entrepreneurs.

**The Biodiversity Institute of Ontario (BIO)**—to learn about BIO’s research on identification of species and how these activities relate to testing, traceability, and food safety standards in Canada and abroad.

**The Ontario Ministry of Agriculture, Food, and Rural Affairs (OMAFRA)**—to listen to presentations on Ontario’s food regulation framework and how this framework intersects with federal, municipal, and private frameworks and standards.

**National Standards Foundation (NSF Canada)**— to learn about NSF Canada’s food safety training and certification programs, and to tour NSF Canada’s testing and food preparation facility.

# Documentation

# Lessons Learned

- Canada has concerted regulation on food safety. Food safety system in Canada involve not only government but also privates, non government organizations, and consumers.
- Food industry is one of the three key economic growth areas in Canada.
- The Food Starter as incubator of food sector business has been performed its role in improving quality and competitiveness of food products produced by small medium enterprises (SMEs).
- The way how to make a good report in English.

# Lessons Learned

[https://www.youtube.com/watch?v=WX2og\\_kkplk&feature=youtu.be](https://www.youtube.com/watch?v=WX2og_kkplk&feature=youtu.be)

# After Return

- Writing article/journal titled “How Indonesia Getting Better Access in Canadian Market: Case of Fish and Processed Fish Products”
- Publish and participate in International Conference held by Trade Research and Development Agency (TREDA) to disseminate the journal
- Sharing Knowledge and Experience

# Evaluation and Suggestion

- TPSA has performed professional in arranging internship program activities
- Excellent facilities and accommodation
- TPSA has maintained all beneficiaries networking
- Internship program more suitable in giving experience and enhancing capacity
